(54) POLLUTANT COLLECTING MAT AND ARRANGING STRUCTURE THEREOF

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a pollutant collecting mat required as a general-purpose collection material capable of corresponding in a large scale at a time of emergency such as the unexpected outflow of an environmental pollutant or a material used in place of soil covering called sanitary landfilling in a final disposal plant of waste, easy to handle and contributing to a cleaning treatment system with respect to a pollutant collecting time or capacity.

SOLUTION: A pollutant collecting mat has a plurality of bag-like parts, a pollutant collecting material charged in the bag-like parts and a means for integrally putting the bag-like parts together. Herein, a shape holding material holding the shape of each bag-like part may be inserted in each of the bag-like parts and a fibrous material or hollow cylindrical material may be mixed with the pollutant collecting material or a weight or fastener may be attached to the bag-like part.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's

decision of rejection]

[Date of extinction of right]
